

Metal or Nonmetals Lab

You will be given the materials below. Describe how you will test to determine if the substances are metals or non-metals.

Substances:

penny, paper clip, rubber band, paper, aluminum foil,

Tools:

Electrical source, alligator clips, and light bulb

Light source

Thermometers

Heat source

Write a lab report describing your efforts including a data table. The report should be based upon the model on [Page 1](#) of your Journal.
